5. Quantité des exportations nationales par groupes spéciaux de marchandises - Pays et région de dédouanement, recoupée suivant le mode de transport 166

EXPLANATORY NOTES

1. Nature of Report:

This publication presents statistics on domestic exports and re-exports according to the last means of transport used in shipping the goods from Canada. Any commodity exported to an overseas destination but shown as leaving Canada by road or rail will have passed into the United States, thence moving by sea or air to the overseas destination. On the other hand, any commodity shown as leaving Canada by air or water can be considered as a direct shipment from a Canadian port.

2. Presentation of Data:

Four principal modes of transport are covered in this report:

1. Water Transport (includes ship and barge)
2. Road Transport (includes truck, car and bus)
3. Rail Transport (includes railway express, even if the express company has moved the goods by road)
4. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

The addition of two supplementary summary tables to this publication raises the total to seven. The first is a summary of the value of domestic exports by country by mode of transport; the second, (1A) a supplement to Table 1, is a summary of domestic exports by Region of customs clearance by mode of transport; the third is a summary of total exports (domestic and re-exports) by country and mode of transport; the fourth, (2A) a supplement to Table 2, is a summary of total exports by region of customs clearance by mode of transport; the fifth details the value of domestic exports in each commodity group to each country and from each region of customs clearance by mode of transport; the sixth shows the total value of re-exports as one commodity group to each country, from each region of customs clearance and by mode of transport; the seventh shows the quantities of domestic exports for those groups where it is available, in the same detail as table 3.

NOTES EXPLICATIVES

1. Nature du rapport:

La présente publication fournit des données sur les exportations nationales et les réexportations, suivant le dernier mode de transport emprunté pour expédier les marchandises du Canada. Toute marchandise exportée outre-mer mais expédiée du Canada par route ou par chemin de fer a été envoyée en premier lieu aux États-Unis puis expédiée outre-mer par bateau ou par avion. Par contre, toute marchandise expédiée du Canada par avion ou par bateau peut être considérée comme une expédition directe d'un port canadien.

2. Présentation des données:

Quatre principaux modes de transport sont compris dans le champ du présent rapport:

1. Le transport par eau (comprend navires et chalands)
2. Le transport par route (comprend camions, voitures et autobus)
3. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
4. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

Deux tableaux récapitulatifs ont été ajoutés, ce qui porte leur nombre à sept. Le premier tableau donne la récapitulation des valeurs des exportations nationales, par pays et par mode de transport; le deuxième, (1A) qui complète le tableau I, donne la récapitulation des valeurs des exportations nationales, par région de dédouanement et par mode de transport; le troisième donne la récapitulation de l'ensemble des exportations nationales et des réexportations, par pays et par mode de transport; le quatrième, (2A) qui complète le tableau 2, donne la récapitulation des exportations totales, par région de dédouanement et par mode de transport; le cinquième montre la ventilation des exportations nationales par groupe de marchandises, par pays de destination, par région de dédouanement et par mode de transport; le sixième indique la valeur totale de l'ensemble des réexportations, par pays de destination, par région de dédouanement et par mode de transport; enfin, le septième tableau indique le volume des exportations nationales par groupe de marchandises, lorsque les chiffres sont connus, la ventilation étant celle du tableau 3.

3. Source of Data:

Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

4. Time Periods:

Export statistics for any period include all goods declared on export entries received at DBS during the period, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of pipeline exports of crude petroleum and natural gas, and effective April 1, 1969, electricity reports only arrive in time for inclusion in statistics for the month following the month of actual report.

5. Coverage:

(a) Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

(b) Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

(c) Exclusions: The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy which is included in commodity group 880 - and a small amount of gold scrap in the form of jewellers' sweepings which is included in commodity group 256-; current coin; settlers' effects; private

3. Source des données:

La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

4. Périodes de temps:

La statistique des exportations pour une période quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au BFS durant la période et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur les exportations de pétrole brut et de gaz naturel exportés par oleoduc et en plus, à compter du 1er avril 1969, les rapports sur l'électricité nous parviennent à temps pour que ces rapports soient inclus seulement dans la statistique pour le mois suivant dans lequel ces exportations ont effectivement eu lieu.

5. Couverture:

a) Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada, de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b) Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le tri ou le remballage ne modifient pas l'état des marchandises importées.

c) Exclusions: Les mouvements de marchandises suivants sont exclus de la statistique des exportations: l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire qui sont inclus dans le groupe 880, et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers, qui est comprise dans le groupe 256; la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les

donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

6. Countries Credited:

Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

7. Regions of Clearing:

The regions appearing in Tables 1A, 2A, 3, 4, and 5 are: Atlantic, Quebec, Ontario, Prairies and Pacific. Exports shown for each region include goods cleared through customs in the provinces shown below.

Region	Provinces of Clearance
Atlantic	Newfoundland Nova Scotia Prince Edward Island New Brunswick
Quebec	Quebec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacific	British Columbia Yukon

Customs clearance in a particular region should not be taken as indicating that the goods originated in that region; inter-regional movement may have and in many cases will have occurred prior to Customs clearance. Origin statistics are more closely reflected in data on exports by region of lading which is not published but is available in the form of machine tabulations on a cost recovery subscription basis.

achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

6. Pays de destination:

Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

7. Régions de dédouanement:

Les régions de dédouanement prévues dans les tableaux 1A, 2A, 3, 4 et 5 sont les suivantes: celle de l'Atlantique, le Québec, l'Ontario, les Prairies et la région du Pacifique. Les exportations indiquées à l'égard de chaque région comprennent les marchandises dédouanées dans les provinces ci-dessous:

Région	Province de dédouanement
Provinces de l'Atlantique	Terre-Neuve Nouvelle-Écosse Île du Prince-Édouard Nouveau-Brunswick
Québec	Québec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacifique	Colombie-Britannique Yukon

La région de dédouanement n'indique pas obligatoirement l'origine d'une marchandise; les marchandises peuvent avoir été transportées d'une autre région avant de passer à la douane, c'est même un cas très fréquent. L'origine des marchandises apparaît avec une plus grande précision dans les statistiques sur les exportations par région de chargement qui ne sont pas publiées mais que l'on peut obtenir sous forme de tableaux mécanographiques auxquels il est possible de s'abonner au prix coûtant.

8. Quantities:

The final table of this publication shows quantities in terms of the units specified in the Export Commodity Classification, Volume I, Cat. No. 12-521, except the unit for commodity groups 71 and 91 which has been changed to hundredweight from pounds because of table design. For certain commodity groups, notably "Cereals, unmilled", conversions have been made to a common unit of quantity to allow showing quantities which could not otherwise have appeared. Where no quantity data is collected or quantity information is in unrelated units that commodity group will not appear in the quantity table. The quantity shown for commodity groups largely composed of classes that specify quantity but also containing few that do not and for groups incorporating classes that contain both whole units and parts, cannot be related to the value (see below). Such groups are identified, in the quantity table, by an asterisk to the right of the unit of quantity designation. It is felt, however, that omitting the quantity entirely for such groups would eliminate data useful to some users of these statistics.

Units of weight or volume relate to the weight or volume of the goods and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts. In groups where both complete units and parts are included, the average value per complete unit can not be calculated. No quantity information is shown for re-exports since these are treated, herein, as comprising one commodity group. All units of quantity used in this report are defined on page 13.

9. Values:

Export entries define the valuation to be placed on exports as f.o.b. place of lading i.e., exclusive of inland freight, insurance, handling etc. The currency in which exports are reported is Canadian dollars. If a foreign currency is reported on the export declaration, then this is converted into Canadian dollars.

10. Abbreviations:

Many descriptions of countries and commodities used in this report are abbre-

8. Quantités:

Le dernier tableau du présent rapport donne les quantités selon le système d'unités de mesure stipulées dans la publication intitulée Export Commodity Classification, Vol. 1, dont le numéro de catalogue est 12-521, à l'exception de l'unité de poids applicable aux groupes 71 et 91, où on a substitué le qtl à la livre, à cause de la disposition du tableau. Dans le cas de certains groupes de marchandises, notamment les céréales non moulues, les quantités ont été converties en une unité commune, afin de permettre la mention de quantités qu'on n'aurait pu indiquer sans cela. Dans les cas où on n'a pas collecté de données quantitatives ou encore où ces données sont en mesures différentes, le groupe de marchandises ne figure pas dans le tableau. Il est impossible de rapporter à la valeur les quantités données pour des groupes de marchandises constitués en majeure partie de classes dont la quantité est précisée, mais qui comprennent aussi quelques classes à l'égard desquelles on ne la précise pas, de même que pour les groupes pour lesquels les chiffres comprennent les articles complets de même que leurs pièces (voir ci-dessous). Dans le tableau de quantité, ces groupes sont identifiés par une astérisque placée à droite de l'unité de quantité. Nous croyons, néanmoins, qu'en omettant complètement les quantités relatives à ces groupes, on éliminerait des données qui peuvent être utiles à ceux qui font usage de cette statistique.

Les unités de poids ou de volume visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces. Pour les groupes où les données visent également des articles complets et des pièces, il est impossible de calculer la valeur moyenne de l'article complet. On ne donne pas de quantités sur les réexportations, vu qu'elles sont considérées, aux fins de la présente publication, comme un groupe de marchandises. Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 13.

9. Valeurs:

Les documents d'exportations définissent la valeur à attribuer aux exportations f.à.b. lieu de chargement i.e., à l'exclusion du transport à l'intérieur du pays, des assurances, de la manutention, etc. La valeur des exportations est déclarée en dollars canadiens. Si les exportations sont déclarées en devises étrangères, la valeur est alors convertie en dollars canadiens.

10. Abréviations:

Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport

viated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

11. Comparability with other statistical series:

Users may wish to compare the export statistics appearing in this report with the transportation statistics produced by the Transportation and Public Utilities Division of DBS. While External Trade statistics are compiled from export entry forms (B-13's) submitted by exporters, those of the Transportation Section are derived from reports submitted by carriers. This basic difference in source material provides an opportunity to view the movements of goods from Canada from two distinctly different angles.

Export statistics are basically a commodity value record. Volume, weight or size of export shipments is secondary, since such quantity information is not at present always available on export documents, nor always presented in a common unit. Accordingly, value provides the only measure by which all exports may be assessed. Transportation statistics, on the other hand, are primarily concerned with gross tonnage of goods moved and with revenue received by the carrier in respect of such movements.

While direct comparison cannot always be made, it is generally possible to account for major differences in the data presented. For example, Canadian trade statistics covering the export of some metal ores show the quantity of metal contained in the ore, while transportation statistics show the gross tonnage of the ore movement.

Another factor making direct comparisons difficult is the inclusion in transportation statistics of a category described simply as "General Cargo" or "General Freight" where knowledge of commodity content is limited. No such general category exists in Canadian trade statistics since every export must be described as to commodity.

Differences of the types outlined above range across all modes of transport

sont abrégées ou incomplètes. La clef des abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans Export Commodity Classification Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

11. Comparabilité avec les autres séries statistiques:

Il se peut que les utilisateurs de la statistique des exportations publiée dans le présent rapport désirent la comparer avec la statistique sur les transports que publie la Division des transports et des services d'utilité publique du BFS. Bien que la statistique du commerce extérieur soit calculée à partir des formules (B-13) d'inscription des exportations, remplies par les exportateurs, celle des transports est fondée sur les rapports des transporteurs. Cette différence fondamentale entre les sources des données permet d'observer le mouvement des marchandises du Canada de deux points de vue très distincts.

La statistique des exportations constitue fondamentalement un dossier de la valeur des marchandises. Le volume, le poids ou la dimension des marchandises exportées représentent des aspects secondaires, vu que ces renseignements ne sont pas, à l'heure actuelle, toujours inscrits sur les documents relatifs aux exportations, ni ne sont-ils toujours donnés à partir d'une mesure commune. En conséquence, seulement la valeur monétaire constitue une mesure commune de toutes les exportations. La statistique des transports, par contre, porte principalement sur le poids brut de marchandises transportées et sur les recettes que touchent les transporteurs à cet égard.

Bien qu'il ne soit pas toujours possible de comparer les chiffres directement, on peut généralement concilier les différences importantes qui surviennent entre les données soumises. Par exemple, la statistique du commerce canadien visant les exportations de certains minerais donne la quantité de métal que contient le minerai, tandis que la statistique des transports donne le poids brut de minerai transporté.

Un autre facteur qui rend difficile toute comparaison, c'est l'inclusion dans la statistique des transports d'une catégorie désignée simplement comme "marchandises diverses"; on dispose ordinairement de peu de renseignements sur la nature précise de ces expéditions. Il n'existe pas une telle catégorie générale dans la statistique du commerce, vu que chaque marchandise d'exportation doit être décrite précisément.

Les différences de ce genre se retrouvent dans tous les modes de transport; mais on peut

but reconciliations can usually be worked out for water and rail, where transportation statistics do provide considerable commodity detail. Exports by air cannot be compared as the Transportation Section does not collect commodity data for this mode of transport. In road transport, commodity detail in transportation statistics is minimal and comparisons, therefore, are rarely possible.

Comparability in respect to pipeline movements of crude petroleum and natural gas, and the movement of electrical energy across the border will be very close since External Trade statistics and those produced by the Energy Statistics Section are derived from the same sources. There are some movements of crude petroleum and natural gas by modes of transport other than pipeline; these, of course, must be considered in the light of the limitations of comparability outlined for those other modes of transport.

ordinairement établir la réconciliation dans le cas des transports maritime et ferroviaire, où la statistique des transports décrit les marchandises avec beaucoup de détail. Il est impossible de comparer les exportations par avion, vu que la Section des transports ne recueille pas de données sur les marchandises expédiées par ce mode de transport. Dans le cas du transport routier, le détail des marchandises par rapport à la statistique des transports est peu considérable et, en conséquence, la comparaison est rarement possible.

Le rapprochement de données concernant le mouvement par pipe-lines du pétrole brut et du gaz naturel et le transport d'énergie électrique outre-frontière, seront très étroits, vu que la statistique du commerce extérieur et celle que prépare la Section de la statistique de l'énergie sont fondées sur les mêmes sources de données. Le pétrole brut et le gaz naturel sont également transportés autrement que par pipe-lines; dans ces cas, naturellement, la comparabilité est restreinte par les facteurs exposés ci-dessus, relativement aux autres mode de transport.

UNITS OF QUANTITY

CORD ..... Volume in cords.

CWT ..... Weight in units of 100 lb.

CWT N ..... Weight of contents in units of 100 lb. (containers excluded).

GAL ..... Volume in Canadian gallons.

LB ..... Weight in pounds.

LB N ..... Weight of contents in pounds (containers excluded).

M B F ..... Volume in thousand board feet.

NO ..... Number.

PAIR ..... Number of pairs.

P GAL ..... Volume of alcoholic content in Canadian gallons of the strength of proof.

TON ..... Weight in short tons of 2,000 lb.

TR OZ ..... Weight in troy ounces.

* ..... An asterisk following a unit of quantity indicates that the quantity cannot be related to the value, see explanatory notes.

UNITÉS DE QUANTITÉ

CORDE ..... Volume en cordes.

GALL ..... Volume en gallons canadiens.

GAL P ..... Volume du contenu alcoolisé en gallons canadiens de preuve.

LIV ..... Poids en livres.

LIV N ..... Poids du contenu en livres (récipients exclus).

M P P ..... Volume en milliers de pieds planche.

NOMB ..... Nombre.

ON TR ..... Poids en onces troy.

PAIRE ..... Nombre de paires.

QTL ..... Nombre en quintal en poids de 100 livres.

QTL N ..... Poids du contenu en quintal de 100 livres (récipients exclus).

TONNE ..... Poids en tonnes courtes de 2,000 livres.

* ..... L'astérisque placée à la droite de l'unité de quantité indique que le chiffre donné ne peut pas être rapporté à la valeur, voir notes explicatives.

EXPLANATORY NOTES

1. Nature of Report:

This publication presents statistics on domestic exports and re-exports according to the last means of transport used in shipping the goods from Canada. Any commodity exported to an overseas destination but shown as leaving Canada by road or rail will have passed into the United States, thence moving by sea or air to the overseas destination. On the other hand, any commodity shown as leaving Canada by air or water can be considered as a direct shipment from a Canadian port.

2. Presentation of Data:

Four principal modes of transport are covered in this report:

1. Water Transport (includes ship and barge)
2. Road Transport (includes truck, car and bus)
3. Rail Transport (includes railway express, even if the express company has moved the goods by road)
4. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

The addition of two supplementary summary tables to this publication raises the total to seven. The first is a summary of the value of domestic exports by country by mode of transport; the second, (1A) a supplement to Table 1, is a summary of domestic exports by Region of customs clearance by mode of transport; the third is a summary of total exports (domestic and re-exports) by country and mode of transport; the fourth, (2A) a supplement to Table 2, is a summary of total exports by region of customs clearance by mode of transport; the fifth details the value of domestic exports in each commodity group to each country and from each region of customs clearance by mode of transport; the sixth shows the total value of re-exports as one commodity group to each country, from each region of customs clearance and by mode of transport; the seventh shows the quantities of domestic exports for those groups where it is available, in the same detail as table 3.

NOTES EXPLICATIVES

1. Nature du rapport:

La présente publication fournit des données sur les exportations nationales et les réexportations, suivant le dernier mode de transport emprunté pour expédier les marchandises du Canada. Toute marchandise exportée outre-mer mais expédiée du Canada par route ou par chemin de fer a été envoyée en premier lieu aux États-Unis puis expédiée outre-mer par bateau ou par avion. Par contre, toute marchandise expédiée du Canada par avion ou par bateau peut être considérée comme une expédition directe d'un port canadien.

2. Présentation des données:

Quatre principaux modes de transport sont compris dans le champ du présent rapport:

1. Le transport par eau (comprend navires et chalands)
2. Le transport par route (comprend camions, voitures et autobus)
3. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
4. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

Deux tableaux récapitulatifs ont été ajoutés, ce qui porte leur nombre à sept. Le premier tableau donne la récapitulation des valeurs des exportations nationales, par pays et par mode de transport; le deuxième, (1A) qui complète le tableau I, donne la récapitulation des valeurs des exportations nationales, par région de dédouanement et par mode de transport; le troisième donne la récapitulation de l'ensemble des exportations nationales et des réexportations, par pays et par mode de transport; le quatrième, (2A) qui complète le tableau 2, donne la récapitulation des exportations totales, par région de dédouanement et par mode de transport; le cinquième montre la ventilation des exportations nationales par groupe de marchandises, par pays de destination, par région de dédouanement et par mode de transport; le sixième indique la valeur totale de l'ensemble des réexportations, par pays de destination, par région de dédouanement et par mode de transport; enfin, le septième tableau indique le volume des exportations nationales par groupe de marchandises, lorsque les chiffres sont connus, la ventilation étant celle du tableau 3.

3. Source of Data:

Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to Statistics Canada.

4. Time Periods:

Export statistics for any month include all goods declared on export entries received at Statistics Canada calendar months. There are some delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of electricity and pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the following month.

5. Coverage:

(a) Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

(b) Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

(c) Exclusions: The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80 % or more of the total value, except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadians posted abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats;

3. Source des données:

Les documents relatifs aux exportations que recueillent les Douanes constituent la principale source de la statistique des exportations, sauf en ce qui concerne l'électricité et le pétrole brut exporté par pipe-line. L'Office national de l'énergie transmet à Statistique Canada les renseignements sur les exportations d'électricité fournis par les entreprises, tandis que les sociétés qui exploitent les pipe-lines lui font parvenir directement les renseignements sur les exportations de pétrole.

4. Périodicité:

La statistique pour un mois quelconque porte sur toutes les marchandises qui figurent dans les documents reçus par Statistique Canada au cours d'un mois civil. Il se produit des retards dans la collecte et l'envoi des documents douaniers, et surtout des documents relatifs aux expéditions par bateau. Les déclarations sur les exportations d'électricité et sur celles de pétroles brut et de gaz naturel par pipe-line, n'arrivent jamais assez tôt pour figurer dans la statistique du mois où ces exportations ont effectivement lieu; il faut donc les reporter au mois suivant.

5. Couverture:

a) Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada, de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b) Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le tri ou le remballage ne modifient pas l'état des marchandises importées.

c) Limites: La statistique sur les exportations ne comprend pas les marchandises suivantes: l'or et les articles en or dont la teneur en or représente 80 % de la valeur totale ou plus, à l'exception de l'alliage d'or à usage dentaire (classe 880-29) et d'une faible quantité de déchets d'or sous forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux Canadiens en poste à l'étranger ou réexportées du Canada par les forces armées des pays de l'OTAN alliés du Canada ou par les

temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

6. Countries Credited:

Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

7. Regions of Customs Clearance:

The regions appearing in Tables 1A, 2A, 3, 4, and 5 are: Atlantic, Quebec, Ontario, Prairies and Pacific. Exports shown for each region include goods cleared through customs in the provinces shown below.

Region	Provinces of Clearance
Atlantic	Newfoundland Nova Scotia Prince Edward Island New Brunswick
Quebec	Quebec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacific	British Columbia Yukon

Customs clearance in a particular region should not be taken as indicating that the goods originated in that region; inter-regional movement may have and in many cases will have occurred prior to Customs clearance.

8. Quantities:

The final table of this publication shows quantities in terms of the units specified in the Export Commodity Classification, Volume I, Cat. No. 12-521, except the unit for commodity groups 71 and 91

diplomates étrangers; les exportations temporaires pour les expositions ou concours (et les films exportés pour projection ou développement ou renvoyés après projection ou développement au Canada); les approvisionnements de soutes et de magasins de navires vendus à des navires ou à des avions étrangers dans les ports canadiens; en général, toutes les exportations temporaires et les marchandises en transit au Canada.

6. Pays de destination:

Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

7. Régions de dédouanement:

Voici les régions de dédouanement qui figurent aux tableaux 1A, 2A, 3, 4 et 5: région de l'Atlantique, Québec, Ontario, région des Prairies et région du Pacifique. Les exportations pour chaque région comprennent les marchandises dédouanées dans les provinces indiquées ci-dessous.

Région	Province de dédouanement
Provinces de l'Atlantique	Terre-Neuve Nouvelle-Écosse Île du Prince-Édouard Nouveau-Brunswick
Québec	Québec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacifique	Colombie-Britannique Yukon

La région de dédouanement n'indique pas nécessairement l'origine des marchandises; elles peuvent avoir été transportées d'une région à une autre avant d'être dédouanées et c'est souvent le cas.

8. Quantités:

Le dernier tableau de cette publication indique les quantités selon les unités de mesure précisées dans le bulletin nº 12-521, Export Commodity Classification, volume 1, sauf en ce qui concerne les groupes 71 et 91 où le

which has been changed to hundredweight from pounds because of table design. Where no quantity data is collected or quantity information is in unrelated units that commodity group will not appear in the quantity table. Quantities appearing for groups which contain one or more classes not specifying a quantity cannot be directly related to value data for that group appearing in Table 3. Groups composed of classes specifying "numbers and parts" cannot yield accurate unit values (see below). Such groups are identified in the quantity table, by an asterisk to the right of the unit of quantity designation.

Units of weight or volume relate to the weight or volume of the goods and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts. In groups where both complete units and parts are included, the average value per complete unit can not be calculated. No quantity information is shown for re-exports since these are treated, herein, as comprising one commodity group. All units of quantity used in this report are defined on page 13.

9. Values:

Export entries require that values be reported f.o.b. place of lading i.e., exclusive of inland freight, insurance, handling etc. The currency in which exports are compiled and published is Canadian dollars. If a foreign currency is reported on the export declaration, it is converted into Canadian dollars.

10. Abbreviations:

Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

11. Comparability with other statistical series:

Users may wish to compare the export statistics appearing in this report with the transportation statistics produced by the Transportation and Public

quintal a été substitué aux livres en raison de la disposition du tableau. Lorsqu'on n'a pas recueilli de données quantitatives pour un groupe de marchandises ou que les données fournies sont exprimées en unités différentes, le groupe en question ne figure pas dans le tableau. Les quantités correspondant à des groupes de marchandises qui se composent d'une ou de plusieurs catégories de marchandises dont la quantité n'est pas précisée, ne peuvent être reliées directement à la valeur donnée au tableau 3. De même, les groupes formés de catégories où figurent "nombre et pièces" ne peuvent produire des valeurs unitaires exactes (voir ci-dessous). Dans le tableau quantitatif, ces groupes sont signalés par un astérisque placé à droite de l'unité.

Les unités de poids ou de volume visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces. Pour les groupes où les données visent également des articles complets et des pièces, il est impossible de calculer la valeur moyenne de l'article complet. On ne donne pas de quantités sur les réexportations, vu qu'elles sont considérées, aux fins de la présente publication, comme un groupe de marchandises. Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 13.

9. Valeurs:

Il faut indiquer sur les documents qui ont trait aux exportations la valeur f.à.b. lieu de chargement, c'est-à-dire la valeur sans le transport à l'intérieur du pays, les assurances, la manutention, etc. La valeur des exportations est donnée en dollars canadiens. Si elle est déclarée en devises étrangères, elle est convertie en dollars canadiens.

10. Abréviations:

Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef des abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans Export Commodity Classification Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

11. Comparabilité avec les autres séries statistiques:

Il se peut que les utilisateurs de la statistique des exportations publiée dans le présent rapport désirent la comparer avec la statistique sur les transports que publie la

Utilities Division of Statistics Canada. While External Trade statistics are compiled from export entry forms (B-13's) submitted by exporters, those of the Transportation Section are derived from reports submitted by carriers. This basic difference in source material provides an opportunity to view the movements of goods from Canada from two distinctly different angles.

Export statistics are basically a commodity value record. Volume, weight or size of export shipments is secondary, since such quantity information is not at present always available on export documents, nor always presented in a common unit. Accordingly, value provides the only measure by which all exports may be assessed. Transportation statistics, on the other hand, are primarily concerned with gross tonnage of goods moved and with revenue received by the carrier in respect of such movements.

While direct comparison cannot always be made, it is generally possible to account for major differences in the data presented. For example, Canadian trade statistics covering the export of some metal ores show the quantity of metal contained in the ore, while transportation statistics show the gross tonnage of the ore movement.

Another factor making direct comparisons difficult is the inclusion in transportation statistics of a category described simply as "General Cargo" or "General Freight" where knowledge of commodity content is limited. No such general category exists in Canadian trade statistics since every export must be described as to commodity.

Differences of the types outlined above range across all modes of transport but reconciliations can usually be worked out for water and rail, where transportation statistics do provide considerable commodity detail. Exports by air cannot be compared as the Transportation Section does not collect commodity data for this mode of transport. In road transport, commodity detail in transportation statistics is minimal and comparisons, therefore, are rarely possible.

Division des transports et des services d'utilité publique de Statistique Canada. Bien que la statistique du commerce extérieur soit calculée à partir des formules (B-13) d'inscription des exportations, remplies par les exportateurs, celle des transports est fondée sur les rapports des transporteurs. Cette différence fondamentale entre les sources des données permet d'observer le mouvement des marchandises du Canada de deux points de vue très distincts.

La statistique des exportations constitue fondamentalement un dossier de la valeur des marchandises. Le volume, le poids ou la dimension des marchandises exportées représentent des aspects secondaires, vu que ces renseignements ne sont pas, à l'heure actuelle, toujours inscrits sur les documents relatifs aux exportations, ni ne sont-ils toujours donnée à partir d'une mesure commune. En conséquence, seulement la valeur monétaire constitue une mesure commune de toutes les exportations. La statistique des transports, par contre, porte principalement sur le poids brut de marchandises transportées et sur les recettes que touchent les transporteurs à cet égard.

Bien qu'il ne soit pas toujours possible de comparer les chiffres directement, on peut généralement concilier les différences importantes qui surviennent entre les données soumises. Par example, la statistique du commerce canadien visant les exportations de certains minerais donne la quantité de métal que contient le minerai, tandis que la statistique des transports donne le poids brut de minerai transporté.

Un autre facteur qui rend difficile toute comparaison, c'est l'inclusion dans la statistique des transports d'une catégorie désignée simplement comme "marchandises diverses"; on dispose ordinairement de peu de renseignements sur la nature précise de ces expéditions. Il n'existe pas une telle catégorie générale dans la statistique du commerce, vu que chaque marchandise d'exportation doit être décrite précisément.

Les différences de ce genre se retrouvent dans tous les modes de transport; mais on peut ordinairement établir la réconciliation dans le cas des transports maritime et ferroviaire, où la statistique des transports décrit les marchandises avec beaucoup de détail. Il est impossible de comparer les exportations par avion, vu que la Section des transports ne recueille pas de données sur les marchandises expédiées par ce mode de transport. Dans le cas du transport routier, le détail des marchandises par rapport à la statistique des transports est peu considérable et, en conséquence, la comparaison est rarement possible.

Comparability in respect to pipeline movements of crude petroleum and natural gas, and the movement of electrical energy across the border will be very close since External Trade statistics and those produced by the Energy Statistics Section are derived from the same sources. There are some movements of crude petroleum and natural gas by modes of transport other than pipeline; these, of course, must be considered in the light of the limitations of comparability outlined for those other modes of transport.

Le rapprochement de données concernant le mouvement par pipe-lines du pétrole brut et du gaz naturel et le transport d'énergie électrique outre-frontière, seront très étroits, vu que la statistique du commerce extérieur et celle que prépare la Section de la statistique de l'énergie sont fondées sur les mêmes sources de données. Le pétrole brut et le gaz naturel sont également transportés autrement que par pipe-lines; dans ces cas, naturellement, la comparabilité est restreinte par les facteurs exposés ci-dessus, relativement aux autres mode de transport.

UNITS OF QUANTITY

CORD ..... Volume in cords

CWT ..... Weight in units of 100 lb.

CWT N ..... Weight of contents in units of 100 lb. (containers excluded).

DZ PR ..... Number of pairs in dozens.

GAL ..... Volume in Canadian gallons.

LB ..... Weight in pounds.

LB N ..... Weight of contents in pounds (containers excluded).

M B F ..... Volume in thousand board feet.

NO ..... Number.

PAIR ..... Number of pairs.

P GAL ..... Volume of alcoholic content in Canadian gallons of the strength of proof.

TON ..... Weight in short tons of 2,000 lb.

TR OZ ..... Weight in troy ounces.

* ..... An asterisk following a unit of quantity indicates that the quantity cannot be related to the value, see explanatory notes.

UNITÉS DE QUANTITÉ

CORDE ..... Volume en cordes

D PRE ..... Nombre de douzaines de paires.

GALL ..... Volume en gallons canadiens.

GAL P ..... Volume du contenu alcoolisé en gallons canadiens de preuve.

LIV ..... Poids en livres.

LIV N ..... Poids du contenu en livres (récipients exclus).

M P P ..... Volume en milliers de pieds planche.

NOMB ..... Nombre.

ON TR ..... Poids en onces troy.

PAIRE ..... Nombre de paires.

QTL ..... Nombre en quintal en poids de 100 livres.

QTL N ..... Poids du contenu en quintal de 100 livres (récipients exclus).

TONNE ..... Poids en tonnes courtes de 2,000 livres.

* ..... L'astérisque placée à la droite de l'unité de quantité indique que le chiffre donné ne peut pas être rapporté à la valeur, voir notes explicatives.

TABLE 1. Domestic Exports by Country and Mode of Transport

Calendar Year 1970

EXPLANATORY NOTES

1. Nature of Report:

This publication presents statistics on domestic exports and re-exports according to the last means of transport used in shipping the goods from Canada. Any commodity exported to an overseas destination but shown as leaving Canada by road or rail will have passed into the United States, thence moving by sea or air to the overseas destination. On the other hand, any commodity shown as leaving Canada by air or water can be considered as a direct shipment from a Canadian port.

2. Presentation of Data:

Four principal modes of transport are covered in this report:

1. Water Transport (includes ship and barge)
2. Road Transport (includes truck, car and bus)
3. Rail Transport (includes railway express, even if the express company has moved the goods by road)
4. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

The addition of two supplementary summary tables to this publication raises the total to seven. The first is a summary of the value of domestic exports by country by mode of transport; the second, (1A) a supplement to Table 1, is a summary of domestic exports by Region of customs clearance by mode of transport; the third is a summary of total exports (domestic and re-exports) by country and mode of transport; the fourth, (2A) a supplement to Table 2, is a summary of total exports by region of customs clearance by mode of transport; the fifth details the value of domestic exports in each commodity group to each country and from each region of customs clearance by mode of transport; the sixth shows the total value of re-exports as one commodity group to each country, from each region of customs clearance and by mode of transport; the seventh shows the quantities of domestic exports for those groups where it is available, in the same detail as table 3.

NOTES EXPLICATIVES

1. Nature du rapport:

La présente publication fournit des données sur les exportations nationales et les réexportations, suivant le dernier mode de transport emprunté pour expédier les marchandises du Canada. Toute marchandise exportée outre-mer mais expédiée du Canada par route ou par chemin de fer a été envoyée en premier lieu aux États-Unis puis expédiée outre-mer par bateau ou par avion. Par contre, toute marchandise expédiée du Canada par avion ou par bateau peut être considérée comme une expédition directe d'un port canadien.

2. Présentation des données:

Quatre principaux modes de transport sont compris dans le champ du présent rapport:

1. Le transport par eau (comprend navires et chalands)
2. Le transport par route (comprend camions, voitures et autobus)
3. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
4. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

Deux tableaux récapitulatifs ont été ajoutés, ce qui porte leur nombre à sept. Le premier tableau donne la récapitulation des valeurs des exportations nationales, par pays et par mode de transport; le deuxième, (1A) qui complète le tableau I, donne la récapitulation des valeurs des exportations nationales, par région de dédouanement et par mode de transport; le troisième donne la récapitulation de l'ensemble des exportations nationales et des réexportations, par pays et par mode de transport; le quatrième, (2A) qui complète le tableau 2, donne la récapitulation des exportations totales, par région de dédouanement et par mode de transport; le cinquième montre la ventilation des exportations nationales par groupe de marchandises, par pays de destination, par région de dédouanement et par mode de transport; le sixième indique la valeur totale de l'ensemble des réexportations, par pays de destination , par région de dédouanement et par mode de transport; enfin, le septième tableau indique le volume des exportations nationales par groupe de marchandises, lorsque les chiffres sont connus, la ventilation étant celle du tableau 3.

3. Source of Data:

Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to Statistics Canada.

4. Time Periods:

Export statistics for any month include all goods declared on export entries received at Statistics Canada calendar months. There are some delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of electricity and pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the following month.

5. Coverage:

(a) Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

(b) Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

(c) Exclusions: The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80 % or more of the total value, except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadians posted abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats;

3. Source des données:

Les documents relatifs aux exportations que recueillent les Douanes constituent la principale source de la statistique des exportations, sauf en ce qui concerne l'électricité et le pétrole brut exporté par pipe-line. L'Office national de l'énergie transmet à Statistique Canada les renseignements sur les exportations d'électricité fournis par les entreprises, tandis que les sociétés qui exploitent les pipe-lines lui font parvenir directement les renseignements sur les exportations de pétrole.

4. Périodicité:

La statistique pour un mois quelconque porte sur toutes les marchandises qui figurent dans les documents reçus par Statistique Canada au cours d'un mois civil. Il se produit des retards dans la collecte et l'envoi des documents douaniers, et surtout des documents relatifs aux expéditions par bateau. Les déclarations sur les exportations d'électricité et sur celles de pétroles brut et de gaz naturel par pipe-line, n'arrivent jamais assez tôt pour figurer dans la statistique du mois où ces exportations ont effectivement lieu; il faut donc les reporter au mois suivant.

5. Couverture:

a) Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada, de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b) Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le tri ou le remballage ne modifient pas l'état des marchandises importées.

c) Limites: La statistique sur les exportations ne comprend pas les marchandises suivantes: l'or et les articles en or dont la teneur en or représente 80 % de la valeur totale ou plus, à l'exception de l'alliage d'or à usage dentaire (classe 880-29) et d'une faible quantité de déchets d'or sous forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux Canadiens en poste à l'étranger ou réexportées du Canada par les forces armées des pays de l'OTAN alliés du Canada ou par les

temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

6. Countries Credited:

Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

7. Regions of Customs Clearance:

The regions appearing in Tables 1A, 2A, 3, 4, and 5 are: Atlantic, Quebec, Ontario, Prairies and Pacific. Exports shown for each region include goods cleared through customs in the provinces shown below.

Region	Provinces of Clearance
Atlantic	Newfoundland Nova Scotia Prince Edward Island New Brunswick
Quebec	Quebec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacific	British Columbia Yukon

Customs clearance in a particular region should not be taken as indicating that the goods originated in that region; inter-regional movement may have and in many cases will have occurred prior to Customs clearance.

8. Quantities:

The final table of this publication shows quantities in terms of the units specified in the Export Commodity Classification, Volume I, Cat. No. 12-521, except the unit for commodity groups 71 and 91

diplomates étrangers; les exportations temporaires pour les expositions ou concours (et les films exportés pour projection ou développement ou renvoyés après projection ou développement au Canada); les approvisionnements de soutes et de magasins de navires vendus à des navires ou à des avions étrangers dans les ports canadiens; en général, toutes les exportations temporaires et les marchandises en transit au Canada.

6. Pays de destination:

Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

7. Régions de dédouanement:

Voici les régions de dédouanement qui figurent aux tableaux 1A, 2A, 3, 4 et 5: région de l'Atlantique, Québec, Ontario, région des Prairies et région du Pacifique. Les exportations pour chaque région comprennent les marchandises dédouanées dans les provinces indiquées ci-dessous.

Région	Province de dédouanement
Provinces de l'Atlantique	Terre-Neuve Nouvelle-Écosse Île du Prince-Édouard Nouveau-Brunswick
Québec	Québec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacifique	Colombie-Britannique Yukon

La région de dédouanement n'indique pas nécessairement l'origine des marchandises; elles peuvent avoir été transportées d'une région à une autre avant d'être dédouanées et c'est souvent le cas.

8. Quantités:

Le dernier tableau de cette publication indique les quantités selon les unités de mesure précisées dans le bulletin nº 12-521, Export Commodity Classification, volume 1, sauf en ce qui concerne les groupes 71 et 91 où le

which has been changed to hundredweight from pounds because of table design. Where no quantity data is collected or quantity information is in unrelated units that commodity group will not appear in the quantity table. Quantities appearing for groups which contain one or more classes not specifying a quantity cannot be directly related to value data for that group appearing in Table 3. Groups composed of classes specifying "numbers and parts" cannot yield accurate unit values (see below). Such groups are identified in the quantity table, by an asterisk to the right of the unit of quantity designation.

Units of weight or volume relate to the weight or volume of the goods and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts. In groups where both complete units and parts are included, the average value per complete unit can not be calculated. No quantity information is shown for re-exports since these are treated, herein, as comprising one commodity group. All units of quantity used in this report are defined on page 13.

9. Values:

Export entries require that values be reported f.o.b. place of lading i.e., exclusive of inland freight, insurance, handling etc. The currency in which exports are compiled and published is Canadian dollars. If a foreign currency is reported on the export declaration, it is converted into Canadian dollars.

10. Abbreviations:

Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

11. Comparability with other statistical series:

Users may wish to compare the export statistics appearing in this report with the transportation statistics produced by the Transportation and Public

quintal a été substitué aux livres en raison de la disposition du tableau. Lorsqu'on n'a pas recueilli de données quantitatives pour un groupe de marchandises ou que les données fournies sont exprimées en unités différentes, le groupe en question ne figure pas dans le tableau. Les quantités correspondant à des groupes de marchandises qui se composent d'une ou de plusieurs catégories de marchandises dont la quantité n'est pas précisée, ne peuvent être reliées directement à la valeur donnée au tableau 3. De même, les groupes formés de catégories où figurent "nombre et pièces" ne peuvent produire des valeurs unitaires exactes (voir ci-dessous). Dans le tableau quantitatif, ces groupes sont signalés par un astérisque placé à droite de l'unité.

Les unités de poids ou de volume visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces. Pour les groupes où les données visent également des articles complets et des pièces, il est impossible de calculer la valeur moyenne de l'article complet. On ne donne pas de quantités sur les réexportations, vu qu'elles sont considérées, aux fins de la présente publication, comme un groupe de marchandises. Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 13.

9. Valeurs:

Il faut indiquer sur les documents qui ont trait aux exportations la valeur f.à.b. lieu de chargement, c'est-à-dire la valeur sans le transport à l'intérieur du pays, les assurances, la manutention, etc. La valeur des exportations est donnée en dollars canadiens. Si elle est déclarée en devises étrangères, elle est convertie en dollars canadiens.

10. Abréviations:

Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef des abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans Export Commodity Classification Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

11. Comparabilité avec les autres séries statistiques:

Il se peut que les utilisateurs de la statistique des exportations publiée dans le présent rapport désirent la comparer avec la statistique sur les transports que publie la

Utilities Division of Statistics Canada. While External Trade statistics are compiled from export entry forms (B-13's) submitted by exporters, those of the Transportation Section are derived from reports submitted by carriers. This basic difference in source material provides an opportunity to view the movements of goods from Canada from two distinctly different angles.

Export statistics are basically a commodity value record. Volume, weight or size of export shipments is secondary, since such quantity information is not at present always available on export documents, nor always presented in a common unit. Accordingly, value provides the only measure by which all exports may be assessed. Transportation statistics, on the other hand, are primarily concerned with gross tonnage of goods moved and with revenue received by the carrier in respect of such movements.

While direct comparison cannot always be made, it is generally possible to account for major differences in the data presented. For example, Canadian trade statistics covering the export of some metal ores show the quantity of metal contained in the ore, while transportation statistics show the gross tonnage of the ore movement.

Another factor making direct comparisons difficult is the inclusion in transportation statistics of a category described simply as "General Cargo" or "General Freight" where knowledge of commodity content is limited. No such general category exists in Canadian trade statistics since every export must be described as to commodity.

Differences of the types outlined above range across all modes of transport but reconciliations can usually be worked out for water and rail, where transportation statistics do provide considerable commodity detail. Exports by air cannot be compared as the Transportation Section does not collect commodity data for this mode of transport. In road transport, commodity detail in transportation statistics is minimal and comparisons, therefore, are rarely possible.

Division des transports et des services d'utilité publique de Statistique Canada. Bien que la statistique du commerce extérieur soit calculée à partir des formules (B-13) d'inscription des exportations, remplies par les exportateurs, celle des transports est fondée sur les rapports des transporteurs. Cette différence fondamentale entre les sources des données permet d'observer le mouvement des marchandises du Canada de deux points de vue très distincts.

La statistique des exportations constitue fondamentalement un dossier de la valeur des marchandises. Le volume, le poids ou la dimension des marchandises exportées représentent des aspects secondaires, vu que ces renseignements ne sont pas, à l'heure actuelle, toujours inscrits sur les documents relatifs aux exportations, ni ne sont-ils toujours donnée à partir d'une mesure commune. En conséquence, seulement la valeur monétaire constitue une mesure commune de toutes les exportations. La statistique des transports, par contre, porte principalement sur le poids brut de marchandises transportées et sur les recettes que touchent les transporteurs à cet égard.

Bien qu'il ne soit pas toujours possible de comparer les chiffres directement, on peut généralement concilier les différences importantes qui surviennent entre les données soumises. Par example, la statistique du commerce canadien visant les exportations de certains minerais donne la quantité de métal que contient le minerai, tandis que la statistique des transports donne le poids brut de minerai transporté.

Un autre facteur qui rend difficile toute comparaison, c'est l'inclusion dans la statistique des transports d'une catégorie désignée simplement comme "marchandises diverses"; on dispose ordinairement de peu de renseignements sur la nature précise de ces expéditions. Il n'existe pas une telle catégorie générale dans la statistique du commerce, vu que chaque marchandise d'exportation doit être décrite précisément.

Les différences de ce genre se retrouvent dans tous les modes de transport; mais on peut ordinairement établir la réconciliation dans le cas des transports maritime et ferroviaire, où la statistique des transports décrit les marchandises avec beaucoup de détail. Il est impossible de comparer les exportations par avion, vu que la Section des transports ne recueille pas de données sur les marchandises expédiées par ce mode de transport. Dans le cas du transport routier, le détail des marchandises par rapport à la statistique des transports est peu considérable et, en conséquence, la comparaison est rarement possible.

Comparability in respect to pipeline movements of crude petroleum and natural gas, and the movement of electrical energy across the border will be very close since External Trade statistics and those produced by the Energy Statistics Section are derived from the same sources. There are some movements of crude petroleum and natural gas by modes of transport other than pipeline; these, of course, must be considered in the light of the limitations of comparability outlined for those other modes of transport.

Le rapprochement de données concernant le mouvement par pipe-lines du pétrole brut et du gaz naturel et le transport d'énergie électrique outre-frontière, seront très étroits, vu que la statistique du commerce extérieur et celle que prépare la Section de la statistique de l'énergie sont fondées sur les mêmes sources de données. Le pétrole brut et le gaz naturel sont également transportés autrement que par pipe-lines; dans ces cas, naturellement, la comparabilité est restreinte par les facteurs exposés ci-dessus, relativement aux autres mode de transport.

UNITS OF QUANTITY

CORD ..... Volume in cords

CWT ..... Weight in units of 100 lb.

CWT N ..... Weight of contents in units of 100 lb. (containers excluded).

DZ PR ..... Number of pairs in dozens.

GAL ..... Volume in Canadian gallons.

LB ..... Weight in pounds.

LB N ..... Weight of contents in pounds (containers excluded).

M B F ..... Volume in thousand board feet.

NO ..... Number.

PAIR ..... Number of pairs.

P GAL ..... Volume of alcoholic content in Canadian gallons of the strength of proof.

TON ..... Weight in short tons of 2,000 lb.

TR OZ ..... Weight in troy ounces.

* ..... An asterisk following a unit of quantity indicates that the quantity cannot be related to the value, see explanatory notes.

UNITÉS DE QUANTITÉ

CORDE ..... Volume en cordes

D PRE ..... Nombre de douzaines de paires.

GALL ..... Volume en gallons canadiens.

GAL P ..... Volume du contenu alcoolisé en gallons canadiens de preuve.

LIV ..... Poids en livres.

LIV N ..... Poids du contenu en livres (récipients exclus).

M P P ..... Volume en milliers de pieds planche.

NOMB ..... Nombre.

ON TR ..... Poids en onces troy.

PAIRE ..... Nombre de paires.

QTL ..... Nombre en quintal en poids de 100 livres.

QTL N ..... Poids du contenu en quintal de 100 livres (récipients exclus).

TONNE ..... Poids en tonnes courtes de 2,000 livres.

* ..... L'astérisque placée à la droite de l'unité de quantité indique que le chiffre donné ne peut pas être rapporté à la valeur, voir notes explicatives.

5. Quantité des exportations nationales par groupes spéciaux de marchandises - Pays et région de dédouanement, recoupée suivant le mode de transport 194

EXPLANATORY NOTES

1. Nature of Report:

This publication presents statistics on domestic exports and re-exports according to the last means of transport used in shipping the goods from Canada. Any commodity exported to an overseas destination but shown as leaving Canada by road or rail will have passed into the United States, thence moving by sea or air to the overseas destination. On the other hand, any commodity shown as leaving Canada by air or water can be considered as a direct shipment from a Canadian port.

2. Presentation of Data:

Four principal modes of transport are covered in this report:

1. Water Transport (includes ship and barge)
2. Road Transport (includes truck, car and bus)
3. Rail Transport (includes railway express, even if the express company has moved the goods by road)
4. Air Transport (includes air express but not air mail)

A fifth designation "Other" covers such movements as pipeline, mail and parcel post and other miscellaneous modes of transport.

The addition of two supplementary summary tables to this publication raises the total to seven. The first is a summary of the value of domestic exports by country by mode of transport; the second, (1A) a supplement to Table 1, is a summary of domestic exports by Region of customs clearance by mode of transport; the third is a summary of total exports (domestic and re-exports) by country and mode of transport; the fourth, (2A) a supplement to Table 2, is a summary of total exports by region of customs clearance by mode of transport; the fifth details the value of domestic exports in each commodity group to each country and from each region of customs clearance by mode of transport; the sixth shows the total value of re-exports as one commodity group to each country, from each region of customs clearance and by mode of transport; the seventh shows the quantities of domestic exports for those groups where it is available, in the same detail as table 3.

NOTES EXPLICATIVES

1. Nature du rapport:

La présente publication fournit des données sur les exportations nationales et les réexportations, suivant le dernier mode de transport emprunté pour expédier les marchandises du Canada. Toute marchandise exportée outre-mer mais expédiée du Canada par route ou par chemin de fer a été envoyée en premier lieu aux États-Unis puis expédiée outre-mer par bateau ou par avion. Par contre, toute marchandise expédiée du Canada par avion ou par bateau peut être considérée comme une expédition directe d'un port canadien.

2. Présentation des données:

Quatre principaux modes de transport sont compris dans le champ du présent rapport:

1. Le transport par eau (comprend navires et chalands)
2. Le transport par route (comprend camions, voitures et autobus)
3. Le transport par chemin de fer (comprend les messageries, même si le service de messageries a transporté les marchandises uniquement par voie routière)
4. Le transport par avion (comprend les messageries aériennes, mais non le courrier aérien)

Une cinquième désignation (Autres) comprend les pipe-lines, le courrier, les colis postaux et les divers autres modes de transport.

Deux tableaux récapitulatifs ont été ajoutés, ce qui porte leur nombre à sept. Le premier tableau donne la récapitulation des valeurs des exportations nationales, par pays et par mode de transport; le deuxième, (1A) qui complète le tableau I, donne la récapitulation des valeurs des exportations nationales, par région de dédouanement et par mode de transport; le troisième donne la récapitulation de l'ensemble des exportations nationales et des réexportations, par pays et par mode de transport; le quatrième, (2A) qui complète le tableau 2, donne la récapitulation des exportations totales, par région de dédouanement et par mode de transport; le cinquième montre la ventilation des exportations nationales par groupe de marchandises, par pays de destination, par région de dédouanement et par mode de transport; le sixième indique la valeur totale de l'ensemble des réexportations, par pays de destination, par région de dédouanement et par mode de transport; enfin, le septième tableau indique le volume des exportations nationales par groupe de marchandises, lorsque les chiffres sont connus, la ventilation étant celle du tableau 3.

3. Source of Data:

Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to Statistics Canada.

4. Time Periods:

Export statistics for any month include all goods declared on export entries received at Statistics Canada calendar months. There are some delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of electricity and pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the following month.

5. Coverage:

(a) Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

(b) Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

(c) Exclusions: The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80 % or more of the total value, except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadians posted abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats;

3. Source des données:

Les documents relatifs aux exportations que recueillent les Douanes constituent la principale source de la statistique des exportations, sauf en ce qui concerne l'électricité et le pétrole brut exporté par pipe-line. L'Office national de l'énergie transmet à Statistique Canada les renseignements sur les exportations d'électricité fournis par les entreprises, tandis que les sociétés qui exploitent les pipe-lines lui font parvenir directement les renseignements sur les exportations de pétrole.

4. Périodicité:

La statistique pour un mois quelconque porte sur toutes les marchandises qui figurent dans les documents reçus par Statistique Canada au cours d'un mois civil. Il se produit des retards dans la collecte et l'envoi des documents douaniers, et surtout des documents relatifs aux expéditions par bateau. Les déclarations sur les exportations d'électricité et sur celles de pétroles brut et de gaz naturel par pipe-line, n'arrivent jamais assez tôt pour figurer dans la statistique du mois où ces exportations ont effectivement lieu; il faut donc les reporter au mois suivant.

5. Couverture:

a) Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada, de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b) Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le tri ou le remballage ne modifient pas l'état des marchandises importées.

c) Limites: La statistique sur les exportations ne comprend pas les marchandises suivantes: l'or et les articles en or dont la teneur en or représente 80 % de la valeur totale ou plus, à l'exception de l'alliage d'or à usage dentaire (classe 880-29) et d'une faible quantité de déchets d'or sous forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux Canadiens en poste à l'étranger ou réexportées du Canada par les forces armées des pays de l'OTAN alliés du Canada ou par les

temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

6. Countries Credited:

Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

7. Regions of Customs Clearance:

The regions appearing in Tables 1A, 2A, 3, 4, and 5 are: Atlantic, Quebec, Ontario, Prairies and Pacific. Exports shown for each region include goods cleared through customs in the provinces shown below.

Region	Provinces of Clearance
Atlantic	Newfoundland Nova Scotia Prince Edward Island New Brunswick
Quebec	Quebec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacific	British Columbia Yukon

Customs clearance in a particular region should not be taken as indicating that the goods originated in that region; inter-regional movement may have and in many cases will have occurred prior to Customs clearance.

8. Quantities:

The final table of this publication shows quantities in terms of the units specified in the Export Commodity Classification, Volume I, Cat. No. 12-521, except the unit for commodity groups 71 and 91

diplomates étrangers; les exportations temporaires pour les expositions ou concours (et les films exportés pour projection ou développement ou renvoyés après projection ou développement au Canada); les approvisionnements de soutes et de magasins de navires vendus à des navires ou à des avions étrangers dans les ports canadiens; en général, toutes les exportations temporaires et les marchandises en transit au Canada.

6. Pays de destination:

Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

7. Régions de dédouanement:

Voici les régions de dédouanement qui figurent aux tableaux 1A, 2A, 3, 4 et 5: région de l'Atlantique, Québec, Ontario, région des Prairies et région du Pacifique. Les exportations pour chaque région comprennent les marchandises dédouanées dans les provinces indiquées ci-dessous.

Région	Province de dédouanement
Provinces de l'Atlantique	Terre-Neuve Nouvelle-Écosse Île du Prince-Édouard Nouveau-Brunswick
Québec	Québec
Ontario	Ontario
Prairies	Manitoba Saskatchewan Alberta
Pacifique	Colombie-Britannique Yukon

La région de dédouanement n'indique pas nécessairement l'origine des marchandises; elles peuvent avoir été transportées d'une région à une autre avant d'être dédouanées et c'est souvent le cas.

8. Quantités:

Le dernier tableau de cette publication indique les quantités selon les unités de mesure précisées dans le bulletin nº 12-521, Export Commodity Classification, volume 1, sauf en ce qui concerne les groupes 71 et 91 où le

which has been changed to hundredweight from pounds because of table design. Where no quantity data is collected or quantity information is in unrelated units that commodity group will not appear in the quantity table. Quantities appearing for groups which contain one or more classes not specifying a quantity cannot be directly related to value data for that group appearing in Table 3. Groups composed of classes specifying "numbers and parts" cannot yield accurate unit values (see below). Such groups are identified in the quantity table, by an asterisk to the right of the unit of quantity designation.

Units of weight or volume relate to the weight or volume of the goods and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts. In groups where both complete units and parts are included, the average value per complete unit can not be calculated. No quantity information is shown for re-exports since these are treated, herein, as comprising one commodity group. All units of quantity used in this report are defined on page 13.

9. Values:

Export entries require that values be reported f.o.b. place of lading i.e., exclusive of inland freight, insurance, handling etc. The currency in which exports are compiled and published is Canadian dollars. If a foreign currency is reported on the export declaration, it is converted into Canadian dollars.

10. Abbreviations:

Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

11. Comparability with other statistical series:

Users may wish to compare the export statistics appearing in this report with the transportation statistics produced by the Transportation and Public

quintal a été substitué aux livres en raison de la disposition du tableau. Lorsqu'on n'a pas recueilli de données quantitatives pour un groupe de marchandises ou que les données fournies sont exprimées en unités différentes, le groupe en question ne figure pas dans le tableau. Les quantités correspondant à des groupes de marchandises qui se composent d'une ou de plusieurs catégories de marchandises dont la quantité n'est pas précisée, ne peuvent être reliées directement à la valeur donnée au tableau 3. De même, les groupes formés de catégories où figurent "nombre et pièces" ne peuvent produire des valeurs unitaires exactes (voir ci-dessous). Dans le tableau quantitatif, ces groupes sont signalés par un astérisque placé à droite de l'unité.

Les unités de poids ou de volume visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces. Pour les groupes où les données visent également des articles complets et des pièces, il est impossible de calculer la valeur moyenne de l'article complet. On ne donne pas de quantités sur les réexportations, vu qu'elles sont considérées, aux fins de la présente publication, comme un groupe de marchandises. Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 13.

9. Valeurs:

Il faut indiquer sur les documents qui ont trait aux exportations la valeur f.à.b. lieu de chargement, c'est-à-dire la valeur sans le transport à l'intérieur du pays, les assurances, la manutention, etc. La valeur des exportations est donnée en dollars canadiens. Si elle est déclarée en devises étrangères, elle est convertie en dollars canadiens.

10. Abréviations:

Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef des abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans Export Commodity Classification Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".

11. Comparabilité avec les autres séries statistiques:

Il se peut que les utilisateurs de la statistique des exportations publiée dans le présent rapport désirent la comparer avec la statistique sur les transports que publie la

Utilities Division of Statistics Canada. While External Trade statistics are compiled from export entry forms (B-13's) submitted by exporters, those of the Transportation Section are derived from reports submitted by carriers. This basic difference in source material provides an opportunity to view the movements of goods from Canada from two distinctly different angles.

Export statistics are basically a commodity value record. Volume, weight or size of export shipments is secondary, since such quantity information is not at present always available on export documents, nor always presented in a common unit. Accordingly, value provides the only measure by which all exports may be assessed. Transportation statistics, on the other hand, are primarily concerned with gross tonnage of goods moved and with revenue received by the carrier in respect of such movements.

While direct comparison cannot always be made, it is generally possible to account for major differences in the data presented. For example, Canadian trade statistics covering the export of some metal ores show the quantity of metal contained in the ore, while transportation statistics show the gross tonnage of the ore movement.

Another factor making direct comparisons difficult is the inclusion in transportation statistics of a category described simply as "General Cargo" or "General Freight" where knowledge of commodity content is limited. No such general category exists in Canadian trade statistics since every export must be described as to commodity.

Differences of the types outlined above range across all modes of transport but reconciliations can usually be worked out for water and rail, where transportation statistics do provide considerable commodity detail. Exports by air cannot be compared as the Transportation Section does not collect commodity data for this mode of transport. In road transport, commodity detail in transportation statistics is minimal and comparisons, therefore, are rarely possible.

Division des transports et des services d'utilité publique de Statistique Canada. Bien que la statistique du commerce extérieur soit calculée à partir des formules (B-13) d'inscription des exportations, remplies par les exportateurs, celle des transports est fondée sur les rapports des transporteurs. Cette différence fondamentale entre les sources des données permet d'observer le mouvement des marchandises du Canada de deux points de vue très distincts.

La statistique des exportations constitue fondamentalement un dossier de la valeur des marchandises. Le volume, le poids ou la dimension des marchandises exportées représentent des aspects secondaires, vu que ces renseignements ne sont pas, à l'heure actuelle, toujours inscrits sur les documents relatifs aux exportations, ni ne sont-ils toujours donnée à partir d'une mesure commune. En conséquence, seulement la valeur monétaire constitue une mesure commune de toutes les exportations. La statistique des transports, par contre, porte principalement sur le poids brut de marchandises transportées et sur les recettes que touchent les transporteurs à cet égard.

Bien qu'il ne soit pas toujours possible de comparer les chiffres directement, on peut généralement concilier les différences importantes qui surviennent entre les données soumises. Par example, la statistique du commerce canadien visant les exportations de certains minerais donne la quantité de métal que contient le minerai, tandis que la statistique des transports donne le poids brut de minerai transporté.

Un autre facteur qui rend difficile toute comparaison, c'est l'inclusion dans la statistique des transports d'une catégorie désignée simplement comme "marchandises diverses"; on dispose ordinairement de peu de renseignements sur la nature précise de ces expéditions. Il n'existe pas une telle catégorie générale dans la statistique du commerce, vu que chaque marchandise d'exportation doit être décrite précisément.

Les différences de ce genre se retrouvent dans tous les modes de transport; mais on peut ordinairement établir la réconciliation dans le cas des transports maritime et ferroviaire, où la statistique des transports décrit les marchandises avec beaucoup de détail. Il est impossible de comparer les exportations par avion, vu que la Section des transports ne recueille pas de données sur les marchandises expédiées par ce mode de transport. Dans le cas du transport routier, le détail des marchandises par rapport à la statistique des transports est peu considérable et, en conséquence, la comparaison est rarement possible.

Comparability in respect to pipeline movements of crude petroleum and natural gas, and the movement of electrical energy across the border will be very close since External Trade statistics and those produced by the Energy Statistics Section are derived from the same sources. There are some movements of crude petroleum and natural gas by modes of transport other than pipeline; these, of course, must be considered in the light of the limitations of comparability outlined for those other modes of transport.

Le rapprochement de données concernant le mouvement par pipe-lines du pétrole brut et du gaz naturel et le transport d'énergie électrique outre-frontière, seront très étroits, vu que la statistique du commerce extérieur et celle que prépare la Section de la statistique de l'énergie sont fondées sur les mêmes sources de données. Le pétrole brut et le gaz naturel sont également transportés autrement que par pipe-lines; dans ces cas, naturellement, la comparabilité est restreinte par les facteurs exposés ci-dessus, relativement aux autres mode de transport.

UNITS OF QUANTITY

CORD ..... Volume in cords

CWT ..... Weight in units of 100 lb.

CWT N ..... Weight of contents in units of 100 lb. (containers excluded).

DZ PR ..... Number of pairs in dozens.

GAL ..... Volume in Canadian gallons.

LB ..... Weight in pounds.

LB N ..... Weight of contents in pounds (containers excluded).

M B F ..... Volume in thousand board feet.

NO ..... Number.

PAIR ..... Number of pairs.

P GAL ..... Volume of alcoholic content in Canadian gallons of the strength of proof.

TON ..... Weight in short tons of 2,000 lb.

TR OZ ..... Weight in troy ounces.

* ..... An asterisk following a unit of quantity indicates that the quantity cannot be related to the value, see explanatory notes.

UNITÉS DE QUANTITÉ

CORDE ..... Volume en cordes

D PRE ..... Nombre de douzaines de paires.

GALL ..... Volume en gallons canadiens.

GAL P ..... Volume du contenu alcoolisé en gallons canadiens de preuve.

LIV ..... Poids en livres.

LIV N ..... Poids du contenu en livres (récipients exclus).

M P P ..... Volume en milliers de pieds planche.

NOMB ..... Nombre.

ON TR ..... Poids en onces troy.

PAIRE ..... Nombre de paires.

QTL ..... Nombre en quintal en poids de 100 livres.

QTL N ..... Poids du contenu en quintal de 100 livres (récipients exclus).

TONNE ..... Poids en tonnes courtes de 2,000 livres.

* ..... L'astérisque placée à la droite de l'unité de quantité indique que le chiffre donné ne peut pas être rapporté à la valeur, voir notes explicatives.
